

## SABINARES BLANCO DE GUARDA 2012

"Recovered plots of old vineyards, numerous varietals among them including Albillo, Viura, Rojal, Malvasía, Chasselas Doré, and other traditional ones unknown at the moment, all located in the natural surroundings of the Sabinares del Arlanza."

## HARVEST 2012

The different varietals were harvested the first week of October. The whole process is extremely artisanal. The clusters are pressed without de-stemming in a small vertical press and the must fermented in barrel. Aged on fine lees for 10 months. The result is a white, complex, delicate, singular and with great potential for aging. It will certainly evolve in the bottle over the next few years.

Production: 720 bottles
